

Taskmaster CUH-Electric Unit Heater

APPLICATIONS

Heavy duty unit heaters for horizontal or vertical mounting. Ideal for space heating of larger areas such as warehouses, open plan stores, sports halls, factories and workshops. Also for anti-condensation heating in plant rooms. When mounted with vertical discharge, can be used to recirculate high level hot air for improved heating efficiency.

FEATURES

- Rugged heavy duty finned metal sheathed elements
- Totally enclosed permanently lubricated motor for increased reliability
- Automatic reset over temperature cut out for added safety
- Fan delay switch to purge unit of residual heat on switch off
- Draw through design for efficient air circulation
- Adjustable directional louvres for optimum airflow
- Flexibility of horizontal or vertical mounting
