Electric Plinth Heater

PRODUCT DESCRIPTION

Our Plinth Heater provides a highly effective concealed heating option for shops, bars, reception areas or similar locations, wherever space is available below cabinets, counters or in soffits.

The use of metal sheathed elements and an axial fan offers a very reliable unit for commercial applications.

FEATURES

- Unobtrusive dark brown grille
- Heavy duty metal sheathed elements
- Axial fan, less susceptible to the effects of dust
- Over temperature safety cut-out
- Positive blow through air flow
- Optional integral thermostat

TECHNICAL SPECIFICATON

Product Code	Description	kW	Volts	Height mm	Width mm	Depth mm	Weight kg
CCB-1000	For recessed mounting	1	230	90	572	295	6.4
CCB-2000	For recessed mounting	2	230	90	572	295	6.4

INSTALLATION

These kickspace or plinth heaters can be installed to provide horizontal or vertical upward airflow. They must be positioned so that there is a limited chance of the obstruction of the airflow. The plinth heater should be securely fixed.

All electrical connections should be made by a suitably qualified person in accordance with the latest edition of the IEE Requirements for Electrical Installation (BS 7671:2008).

Full installation details can be downloaded from our [website](#).
