

**UFO
MICATRONIC
INFRARED
TOWER HEATER**

Turnbull & Scott™
Trusted.

PRODUCT DESCRIPTION

The Micatronic Infrared Tower heater is an innovative vertical freestanding infrared heater, suitable for indoor and covered outdoor use.

With a sleek black aluminium body, it provides quick and effective heat for commercial spaces and large indoor spaces.

Like the heat from the sun, infrared heat only warms the objects around it, providing a highly effective heating solution with minimal waste.

The unique Micatronic technology uses nanotechnology and a tetragonal coiling system over a mica-rod to allow the filament to operate vertically. It also gives the heater three times the lifespan of classic infrared technology.

Easily portable, the vertical heater is protected against tipping over and features a safe proximity sensor with automatic cutoff.

The remote control with LCD screen allows you to control the heater's five heat settings as well as power and timer settings. It also has an option for a programmable sleep mode.

With an IPX4 rating, it protects from water splashes from all directions. Also included are a heat resistant black PVC cable, UK plug and all necessary installation parts.

KEY FEATURES

- 2.3kW heat output
- Single phase 230v supply
- Remote switch with five power levels
- Unique vertical design
- 8-23m2 heating capacity
- Micatronic heating element gives 3 times the lifespan
- High performance
- Tip-over safety feature
- Safe-proximity sensor
- IPX4

TECHNICAL SPECIFICATIONS

Product Code	Watts	Hertz	Volts	Heat Capacity (m2)	Length (mm)	Height (mm)	Depth (mm)	Weight (kg)
Mica-2300	2300	50-60	230	23	403	1113	379	3.0

Control:

The heaters are supplied with a remote control that provides 5 levels of comfort heat:

1. 0.3 kW/s
2. 1.6 kW/s
3. 1.9 kW/s
4. 2.1 kW/s
5. 2.3 kW/s

DESIGN & INSTALLATION

All electrical connections should be made by a suitably qualified electrician.

Suitable for covered outdoor use. Take a look at our UFO S-29 Infrared Heater which can be used in outdoor spaces.

For more detailed operating and installation instructions, please get in touch.
