ABOUT US

Formed in 1933 Turnbull & Scott are experts in heat transfer. We design, manufacture, and supply a wide range of heating and cooling products. We have an enviable reputation for solving our commercial and industrial customers' comfort or process heating, cooling and energy saving challenges.

Our reputation has been built not just on our 90 years of experience, but also our commitment to innovation and training. Our highly trained specialist engineers enjoy nothing more than understanding customer issues, developing novel solutions and delivering these within specification, time and budget.

We continually build on these foundations and have developed an enviable body of knowledge on thermodynamics, structural engineering, pressurised equipment and life cycle management. This is proving invaluable to customers in building services, nuclear, paper, chemical, food processing, textiles, aggregates and the low carbon economy.

We are ready to help our customers achieve their Zero Carbon goals and have placed sustainability at the heart of our Values.

OUR PROMISE

Our customers trust us to understand, solve and deliver the solution to their comfort or process heating, drying, cooling, chilling and energy saving challenges.

Trusted.

...to Understand

- Partnership approach to building long standing relationships
- Initial enquiry and discovery calls - in person or MS Teams
- Iterative design process from heat balance to detailed design
- Site Surveys

...to Solve

- Time-tested design philosophies
- Proprietary research backed software 'S-Calc'
- Dedicated design centre
- AutoCAD Inventor - 3D modelling & manufacturing drawings
- Wide range of heat transfer media - steam, water, thermal oils, exhaust gases & wide range of liquid, gaseous & vaporous chemicals

...to Deliver

- 60,000 sq. ft Manufacturing facility
- 5t lifting capability
- ISO 9000, ISO 14000 & ISO 45001
- Weld procedures to BS EN ISO 15614
- Welders to BS EN ISO 9606

Air Curtains and Industrial Unit Heaters

Whether you have a shop, large retail space, office or church to heat, keeping customers and staff comfortable and warm is a real priority. We offer a distinctive range of heaters both electric, and LPHW and steam models.

Heaters for Commercial Applications

Starting from sub-level floor we have discreet Trench Heating, LPHW or electric. Moving up to floor level we offer stylish LPHW Finned Tube Radiators, Floor Standing Trench and a selection of electric Wall Heaters.

Heat Exchangers for Drying

Turnbull & Scott is renowned for the design and manufacture of high end, robust Air Heater coils and batteries which are extensively used in industrial process drying applications worldwide.

Air Coolers & Chillers

Turnbull & Scott provides industrial process cooling and HVAC related cooling solutions for the broadest range of applications including those with requiring ultra-precise sub-ambient air temperature fluid temperature control.

Product Selection Tool & Support

Product Type	No. of Units	Model	Power (kW)	Length (m)	Width (m)	Height (m)	Weight (kg)	Notes
Electric	1	1000	100	1.0	0.5	0.5	100	
Electric	1	2000	200	2.0	1.0	1.0	200	
Electric	1	3000	300	3.0	1.5	1.5	300	
Electric	1	4000	400	4.0	2.0	2.0	400	
Electric	1	5000	500	5.0	2.5	2.5	500	
Electric	1	6000	600	6.0	3.0	3.0	600	
Electric	1	7000	700	7.0	3.5	3.5	700	
Electric	1	8000	800	8.0	4.0	4.0	800	
Electric	1	9000	900	9.0	4.5	4.5	900	
Electric	1	10000	1000	10.0	5.0	5.0	1000	

Identify the best trench heater for you, using our Specification & Costing Tool. We also have numerous downloadable materials which can be accessed for free on our website.

Heat Recovery Solutions

Turnbull and Scott specialise in industrial waste heat recovery equipment, and our thermal energy experts will help you assess your heat recovery project and establish the best solution.

Become an Installation Partner

We supply lphw, steam and electric heater products to customers throughout the UK. If you are a heating system contractor working in the commercial and industrial space and would like to become part of our installation partners' network, please get in touch.

Design Studies & Collaboration

The breadth and depth of our team's engineering expertise enables us to support our customers, from a broad range of industries, in the conceptualisation, evaluation and implementation of their heat recovery and heat transfer projects.
